 14" Radial Tires
 2" Ball Coupler
 3 Year Warranty

Tube Steel Frame;
 We use an all tube-steel frame creating a more rigid frame than angle iron or C-channel. This rigid frame eliminates the need for an angle iron railing, allowing us to offer removable treated lumber sides.

Rubber Torsion Axle;
 Our single axle trailers feature A rubber torsion axle which is a torsion arm fastened to a rubber encased bar. This design eliminates leaf springs, creating a maintenance-free suspension. Torsion is also a smoother riding suspension when compared to leaf springs.

Primed and Painted;
 Our trailers are thoroughly primed and painted with Valspar's Supreme acrylic enamel. The steel is acid washed before welding and again before the painting process.
